## What is the Ozone?

Ozone is a gas with a very high oxidation power and It is the strongest disinfectant known in the world. The high oxidation power of ozone plays a fully active role in the destruction of bacteria. The disinfection effect of ozone gas is 3125 times more and 50% faster than chlorine under the same conditions. The disinfecting effect of ozone is due to its strong oxidizing properties. It oxidizes viruses and bacteria, as well as all kinds of microorganisms and toxins.

## Ozone and Ozontek Sauna

After the ozontek sauna application, the body produces cytokines, interferons and other protective special messengers, which are the immune cells of the body, in response to this activation. Following this, the whole immune system, which is stimulated, notifies other immune cells in a chain manner and increases the resistance against diseases. ozone is effective in all diseases which the immune system is weakened. ozontek sauna increases the body's resistance. ozone increases the body's resistance especially against infections. ozone sauna removes toxins in the body. Ozone sauna also deactivate bacteria, viruses, fungi and germs.
